

Listen - Primer on Political Islam

Understand Islam to Help Fight a Takeover

Political Islam is rising fast in Texas. You may want to hide and ignore it, but you cannot! We need you to help us fight for our country. Please listen to this as soon as you can. It is a wonderful tutorial from a former Islamist who is now a Christian.

Texas Eagle Forum has been fighting to keep sharia law out of Texas for over 10 years. We were instrumental in passing American Law for American Courts (ALAC) in 2017 after several years of trying. This last session, we helped kill at least 4 bills that would have furthered sharia compliance in Texas. We also helped spread the word on the need to kill resolutions that recognized various Islamic celebrations, nations, or people - something that is considered ground-taking under sharia law. Unfortunately, several passed.

We need you to be as informed as possible. At Eagle Forum, we don't kick and scream about problems. Instead, we inform our elected officials, friends, and neighbors with facts as we work to protect what God gave us. We do that well when we take time to understand the problem.

For those who wish to learn more, we recommend Bill Warner's website - **[Learn about Political Islam | CSPII](#)**. You will find additional resources on our website at TexasEagleForum.com under the Hot Topics tab.

If God is calling you to step up on this issue, please email us at TEF@TexasEagleForum.com and let us know. We also value any feedback you want to give us on the value of this information.

We hope you were blessed by intentionally engaging in gratitude this past week. We will always be thankful for Eagles across Texas.
